

RFOED-RF: own-node-miss
(98.7% of errors)

test document, true class c_j

correctly passes earlier
nodes $c_1, \dots, c_{j-1}$

reaches its own node c_j

node c_j **does not fire**
(under-confident: test score $< \tau$)

RFOED-NN: early-capture
(95.4% of errors)

test document, true class c_j

an *earlier* node c_i ($i < j$)
fires a false positive
(over-confident: neg. score $> \tau$)

the document is removed
from contention

its own node c_j
never reached
